

## **Property Survey Information Summerhaven, Mt. Lemmon**

Monday, August 18, 2003

- The Department of Transportation Survey Section has been staking the public property also known as public right-of-way
- Survey stakes to identify the public right-of-way and the start of public property will be placed throughout the Summerhaven. The outside boundaries will be marked with a wooden stake.
- All private property corners including those on the back lot lines will be recovered. This is necessary to assist in the staking of the right-of-way and subdivision boundaries.
- All recovered survey monuments will be recorded to Arizona State Plane Coordinate (NAD 83) system. This will make Summerhaven compatible with Pima County's GIS and any current and future orthophoto mapping.
- Survey information will be shared as it becomes available with local surveyors. This process has begun with the current topographic mapping of Summerhaven.
- The survey information will be used to file a Record of Survey. Although the final Record of Survey will not be ready for several months, the recovery and marking of the survey monuments as they are recovered allows for their immediate use by Pima County and the community.

For more information on the survey project, call Community Relations at 740-6410
